

# AiDash IVMS Proposal for Pilot

**AIDASH**

## AiDash proposes to set up a dedicated instance of IVMS with following modules configured & customized as per client requirements.

### Line Clearance

Cycle trim planning  
Hot-spotting / Mid-cycle trim

### Work Management

Contractor management & bid packs  
Work orders  
Work prioritization & scheduling

### Hazard Tree

Outside RoW  
Inside RoW

### Budget Planning

Budget allocation & optimization  
Contractor spend optimization

### Remote Survey

Transmission line survey  
Regulatory reports

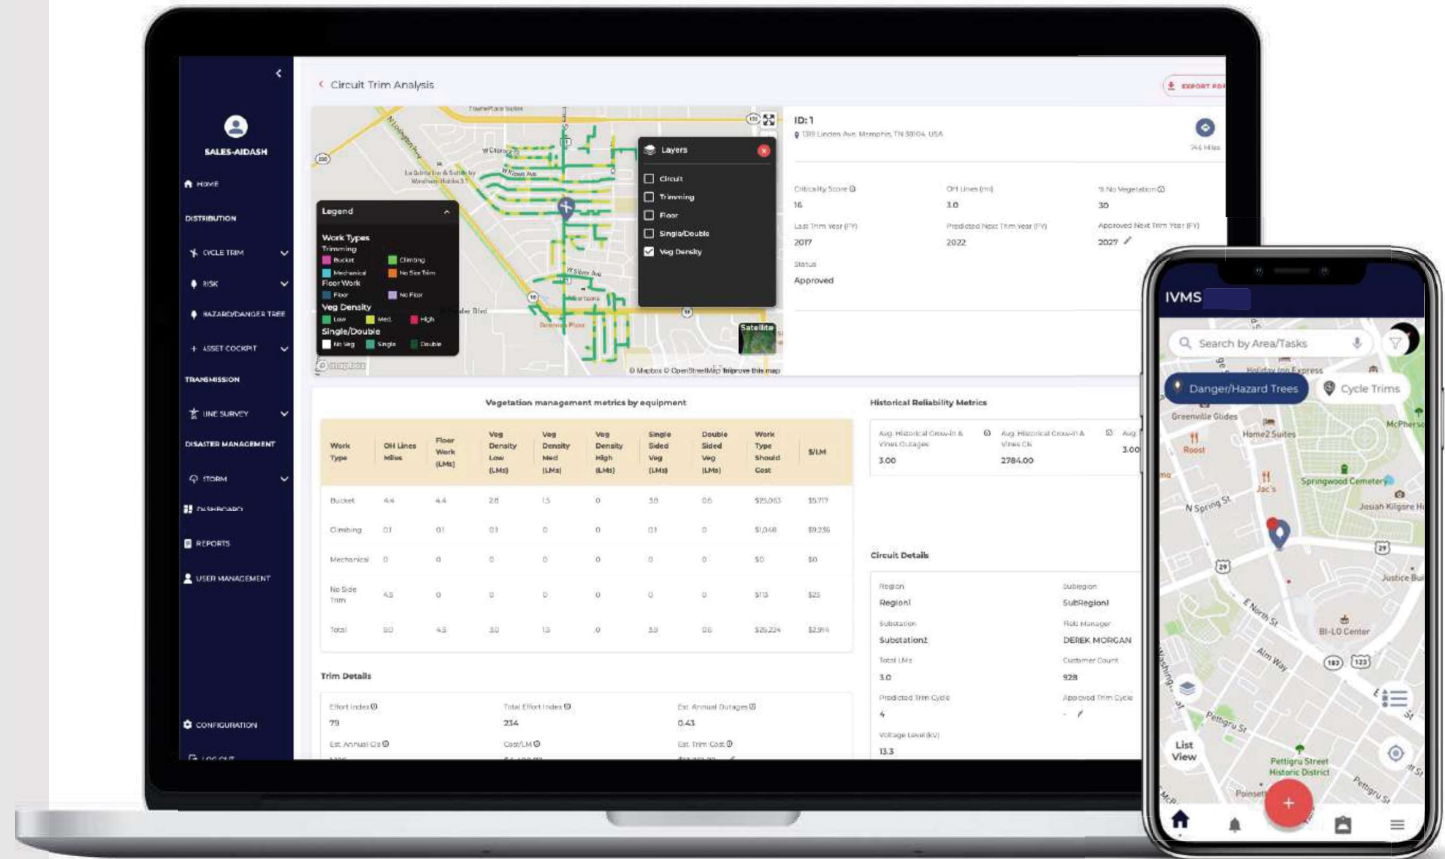

### Herbicides & Growth Regulators

### Fire Mitigation

### Reports, dashboards & customizations

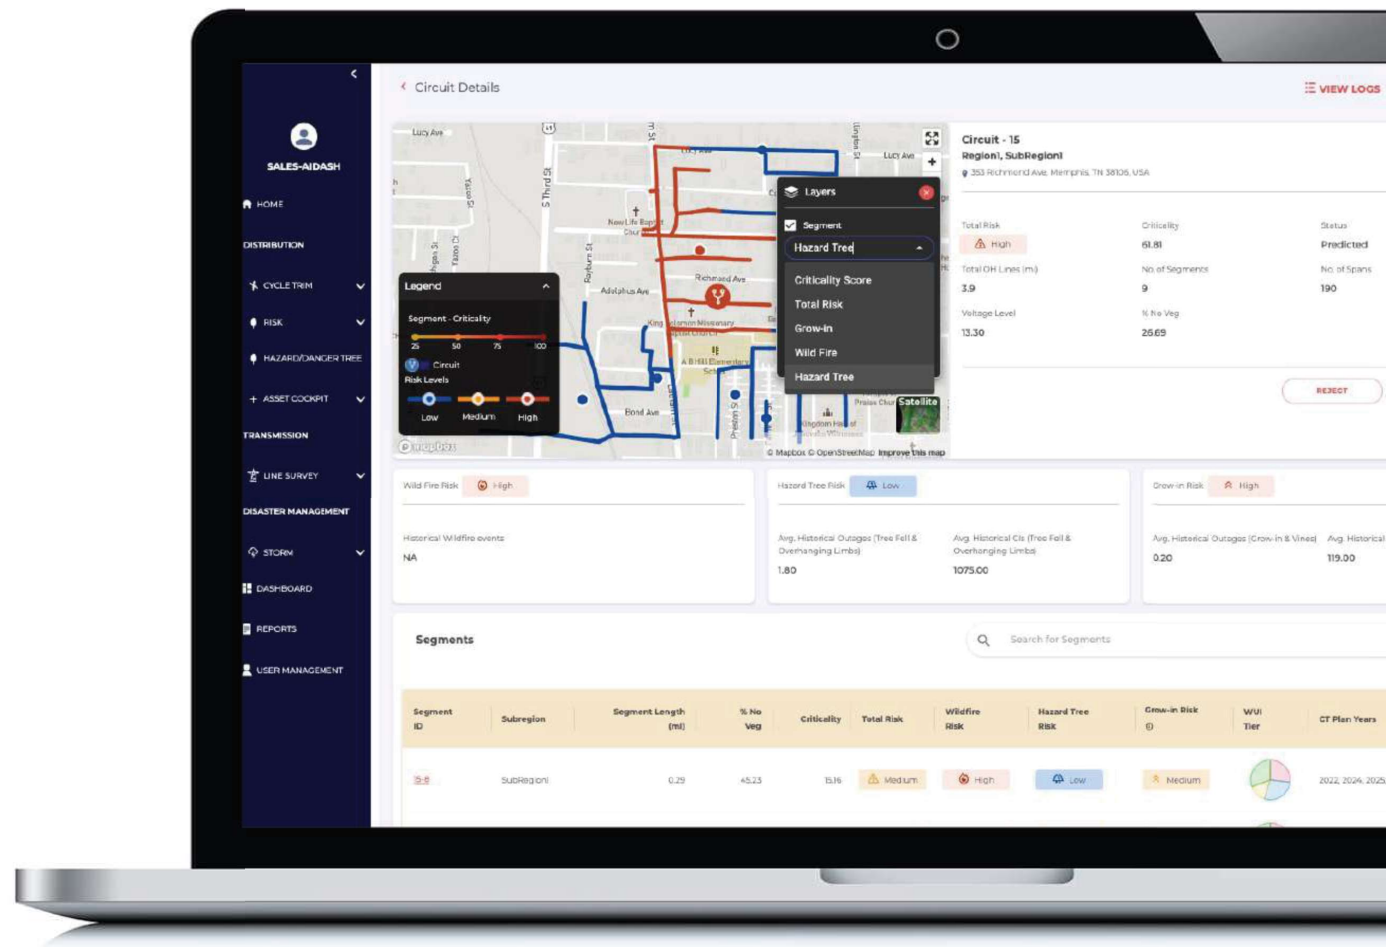

# Line Clearance Module

- Cycle trim planning
- Hot-spotting / Mid-Cycle Trim
- Pruning Prioritization
- Vegetation Density Analysis
- Floor Work Identification
- Work/ Equipment Type Identification

# Hazard Tree Module

- Proactively Identify Hazard Trees
- Quantity Hazard Tree Risk
- Identify areas of high impact
- Circuit, Segment, and Span Level Risk Analysis

# Remote Survey Module

- Transmission line survey
- Suggested Actions
- Regulatory reports

Survey Analysis

Line 8	SubRegion 1	4.68	115.0	0.91	0.22 (4.78%)	29.30	279.73	\$4,680.00	Apply Herbicides/TCR	

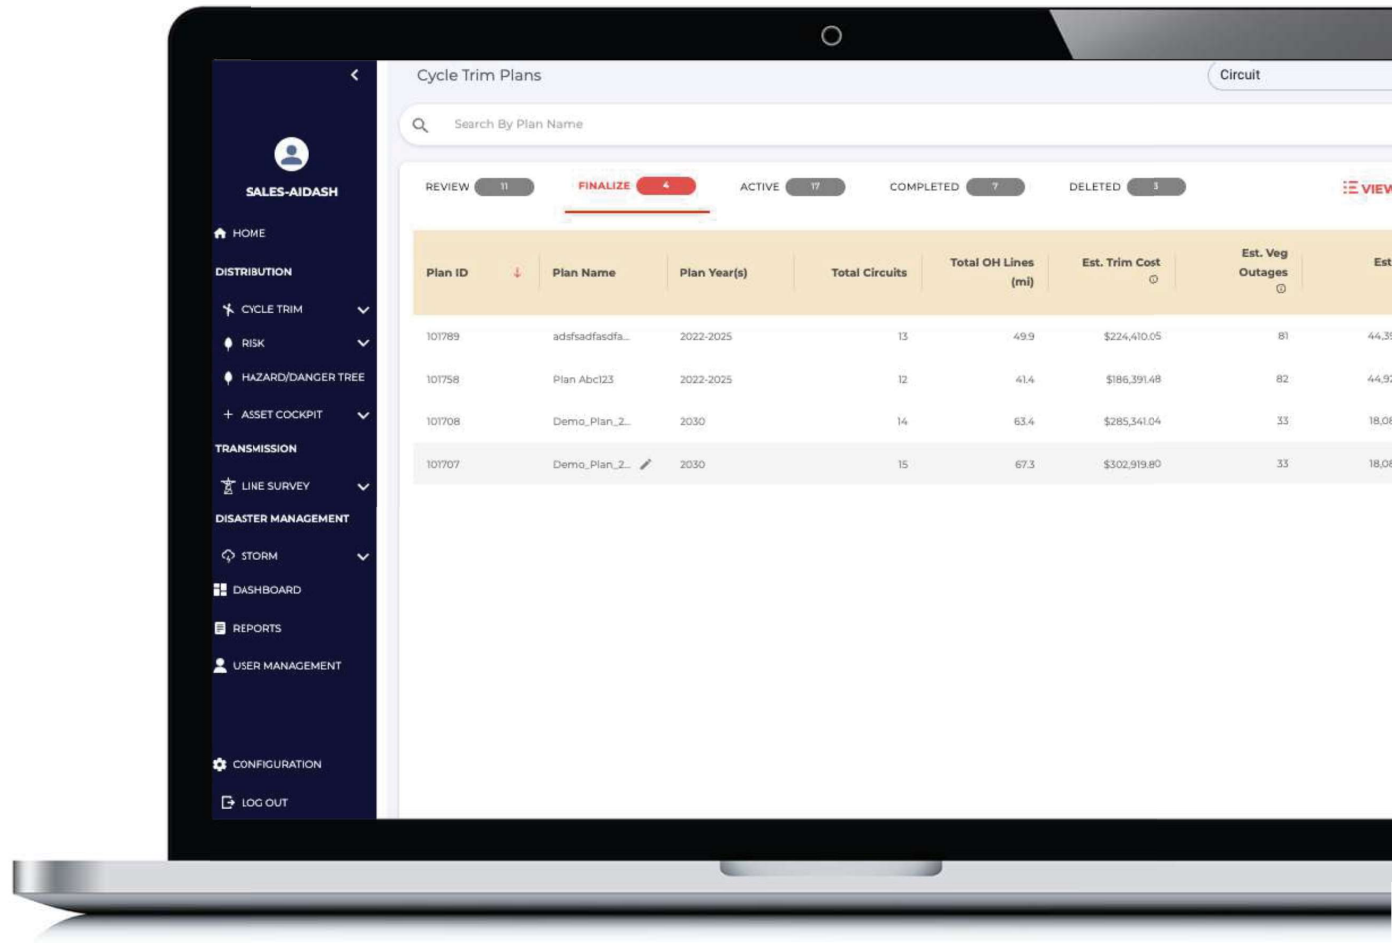

# Work Management Module

- Contractor management
- Bid pack creation
- Work orders and assignment
- Work prioritization & scheduling
- Mobile application for field notes and collaboration
- Interactive dashboards to help manage contractors

# Budget Planning Module

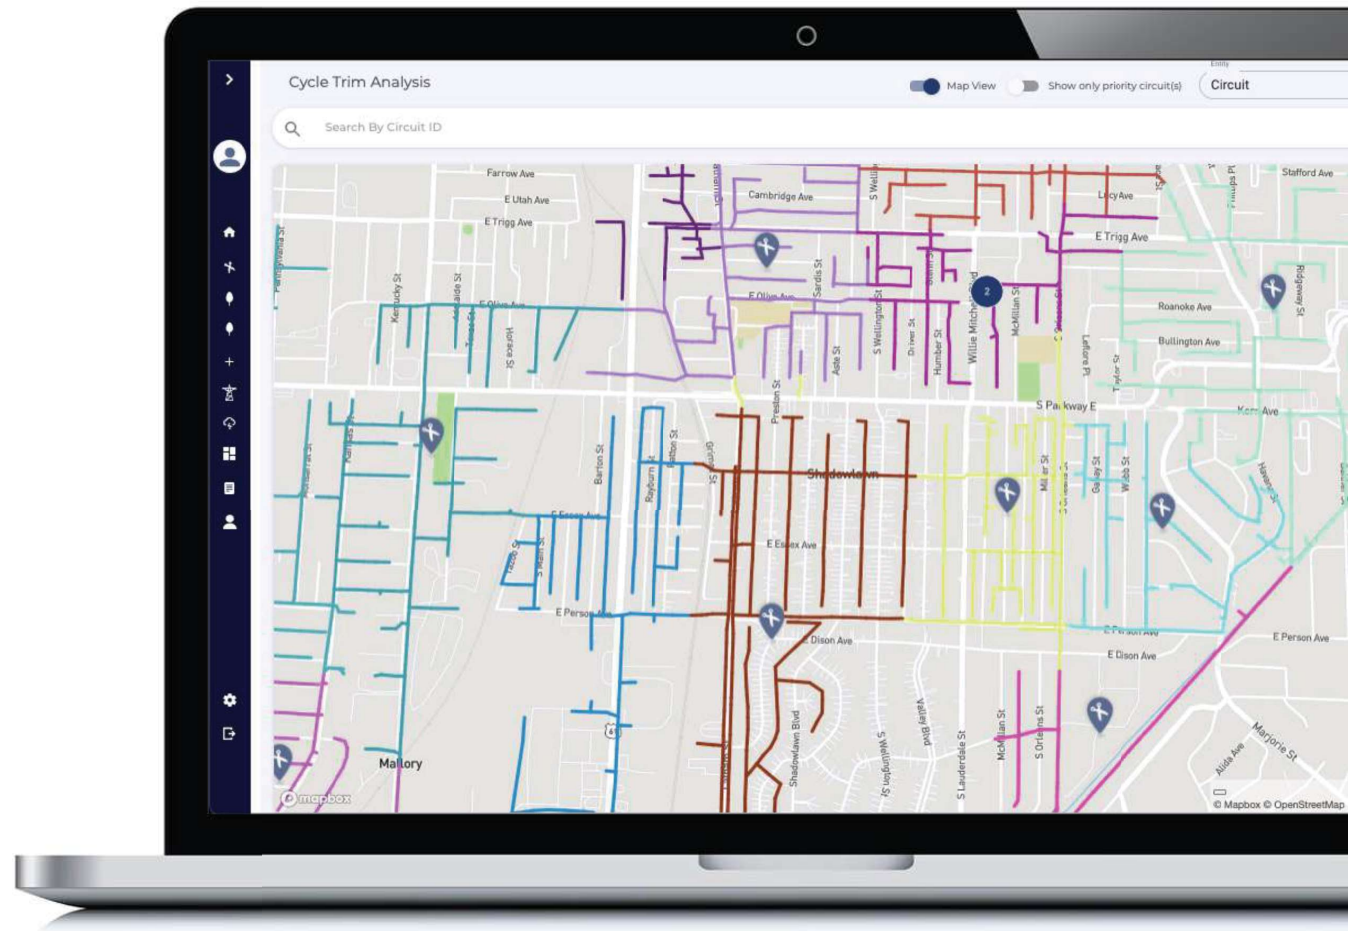

- Budget allocation & prioritization
- Scenario-based budget planning
  - Scenarios based on impact to reliability indexes, veg-related outages, customer interruptions, and volume of work
- Accurately estimate vegetation management expenses
- Contractor spend optimization

# Herbicide/ Tree Growth Regulator (TGR) Efficacy Analysis

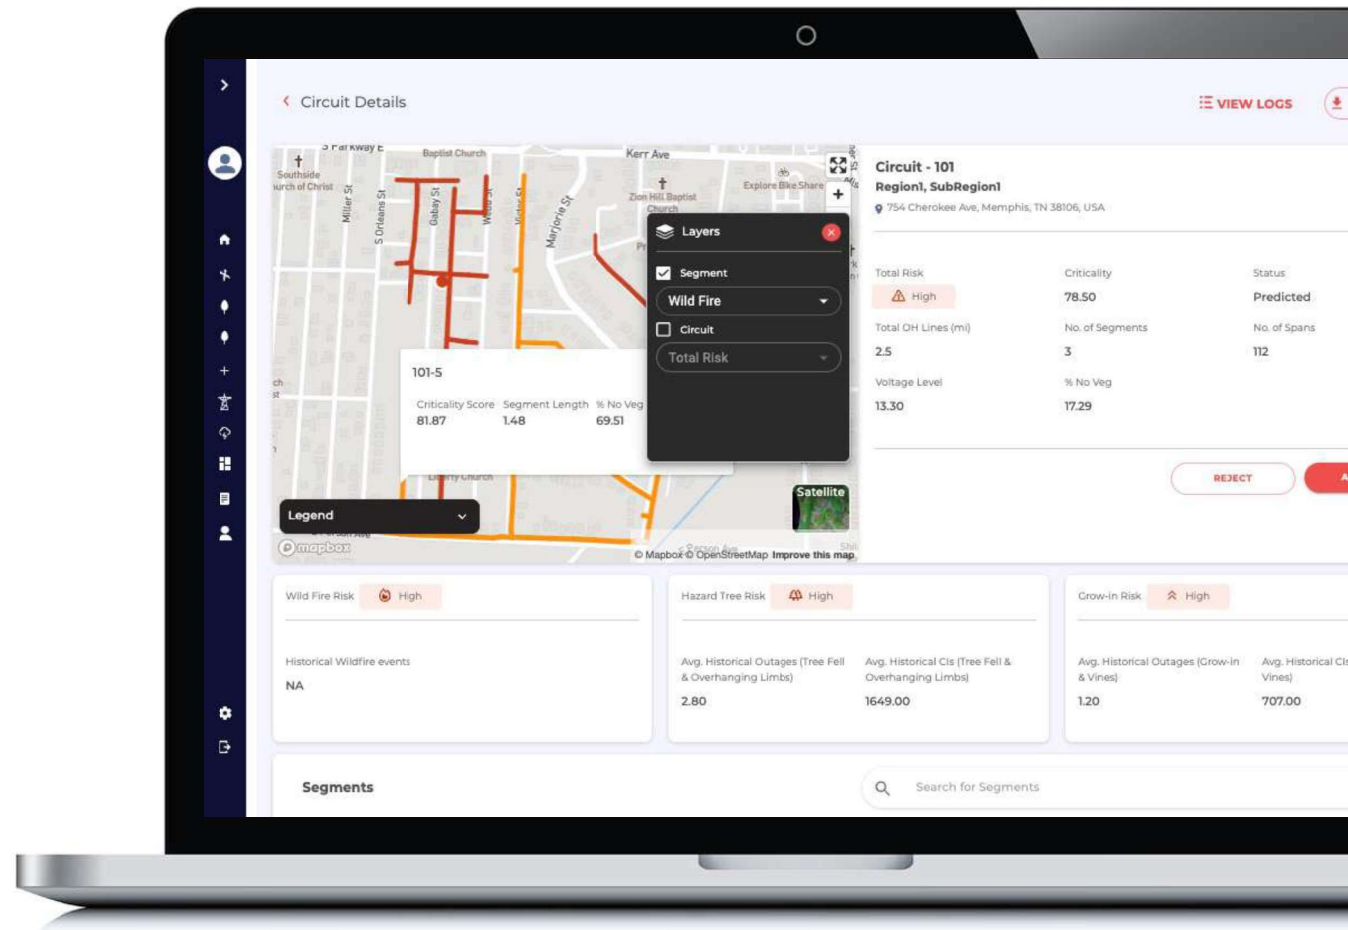

- Measure herbicide kill rates with multispectral analysis
- Change detection analysis from several years to measure TGR efficacy

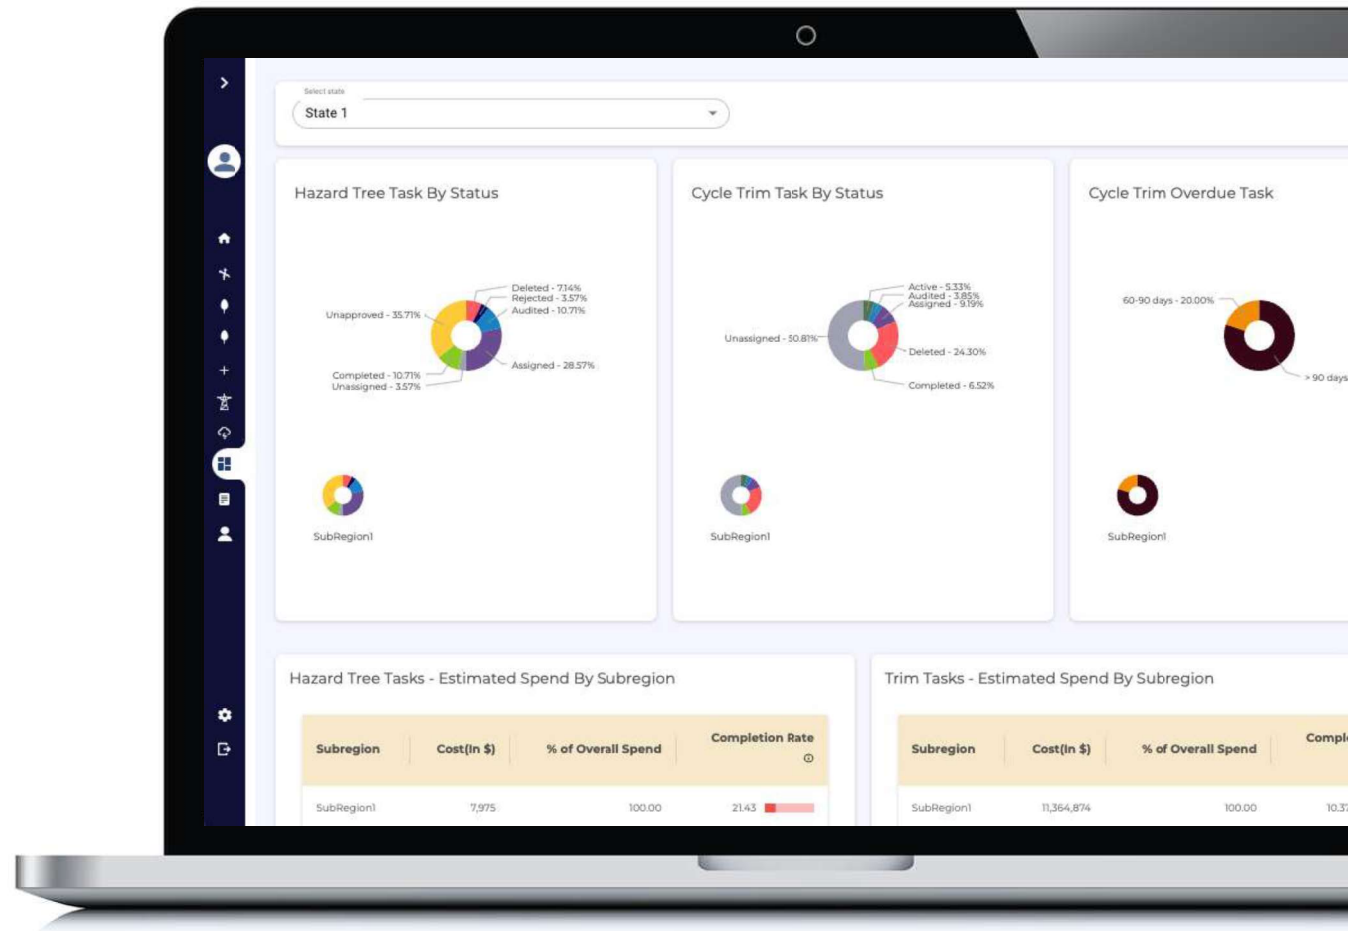

# Wildfire Risk Mitigation Module

- Identify Vegetation-related ignition points
- Measure Impact
- Spread analysis, identifying fire breaks
- Quantify Wildfire Risk
- Plan wildfire mitigation activities with this analysis

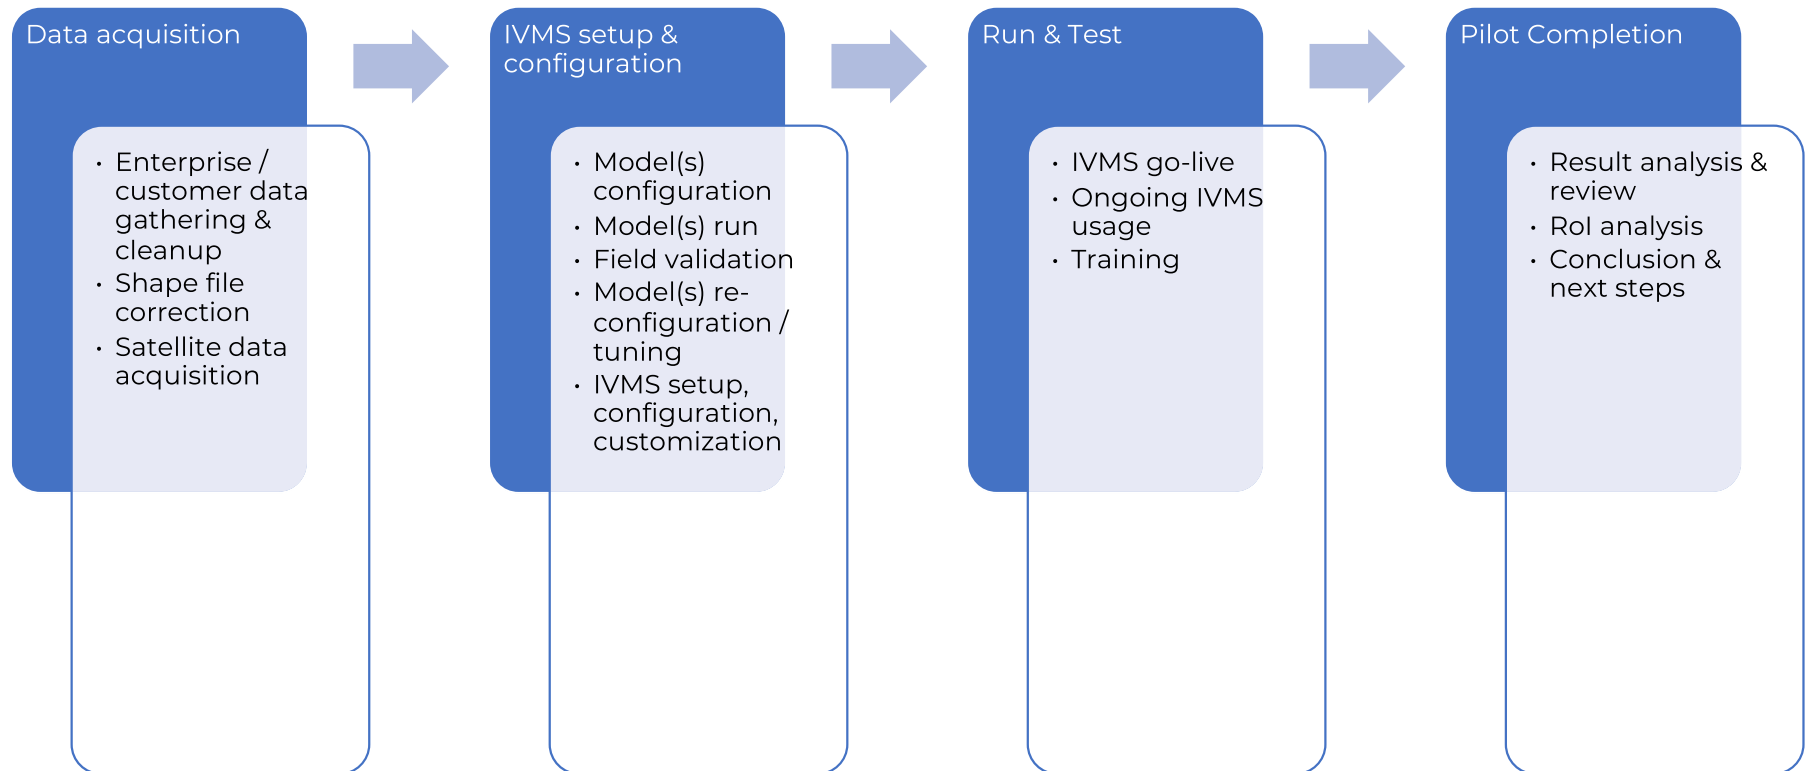

## Reports, dashboards & customizations

- Creation of custom reports and dashboards
- Customize based on region
- Work Type
- Hazard Tree Tasks
- Cycle Trim Tasks
- Tasks Status
- Clearances
- Contractor allocation
- Spend analysis

## Execution Plan

# Exhibit B

## SCHEDULE 1 Software as a Service (SaaS) DESCRIPTION

Capitalized terms used but not defined in this Schedule 1 have the meaning given to those terms in the Agreement.

### A. DESCRIPTION OF SERVICES AND SPECIFICATIONS

The provider shall provide the Customer, access to its proprietary SaaS product(s) and module(s) as specified below:

1. **Product/Tool:** AiDash Intelligent Vegetation Management System (IVMS) for electric power distribution & transmission lines. *SaaS version*

2. **Mobile Application Deployment/ Instance:** The latest standard mobile application version can be downloaded from the relevant app store (iOS and/or Android).

3. **Modules:** (this may vary depending on whether distribution lines, transmission lines or both are in scope of implementation or depending on what modules customer requests):

i. Distribution Cycle Trim Module (e.g., predicted trim years

a. Predicted Trim Year (circuit & sub-circuit analysis)

b. Criticality Score

c. Derived metrics (e.g., total effort index, % of network with no vegetation within a specific distance of conductor, etc.)

d. Work Planning/Optimization

e. Bid Packet Creation

f. Task Assignment & Progress Monitoring

g. Work Type Identification (e.g., bucket trim, backlot trim, mechanical/off-road)

ii. Distribution Risk Module

a. Grow-in Risk (inside ROW)

b. Hazard Tree / Fall-in Risk (inside ROW and outside ROW)

c. Criticality Score

d. Work Planning/Optimization

e. Task Assignment & Progress Monitoring

iv. Standard Reports

v. Field Mobile App (iOS and/or Android)

vi. Wild Fire Risk Module

4. **Support:** Base support 9 AM – 5 PM US Eastern time (Monday – Friday) on all official working days in US is included in the SaaS fee.

5. **Usage Limitations** (additional usage will incur additional fee):

i. Total line miles included (Distribution): 210

iii. Unlimited users shall be granted access to the system

6. **START DATE:** ~~05-01-2023~~ 6/1/2023

7. **Period of Service (Term):** Customer can choose one of the following 3 terms:

i. **One year term:**

ii. **Three-year term:** X
