Advice Letter No. 465-E

(913 E)

CALIFORNIA PUBLIC UTILITIES COMMISSION

Bear Valley Electric Service, Inc. ("BVES") hereby transmits for filing the following:

SUBJECT: GHG Environmental Performance Standard (EPS) Compliance Filing- 2022

PURPOSE

Pursuant to Ordering Paragraph No. 4 of Decision ("D.") 07-01-039, issued in R. 06-04-009 on January 25, 2007, BVES submits this annual Attestation Letter affirming that the financial commitments BVES has entered into for generation during the prior calendar year are in compliance with the greenhouse gas ("GHG") emissions performance standard ("EPS"). Specifically, BVES is in compliance with the EPS as it has no generation facilities and no long-term financial commitments for generation.

This Attestation Letter provides information and documentation required by D.07-01-039. This Attestation Letter demonstrates that for **2022** BVES has entered into financial commitments that are in compliance with the EPS (long-term financial commitments defined on Page 3 of Attachment 7 in D.07-01-039).

BACKGROUND

D.07-01-039 requires all Load Serving Entities ("LSEs") to file annual Attestation Letters by February 15 of each year, attesting to the Commission that the financial commitments entered into for generation during the prior calendar year are in compliance with the EPS. D.07-01-039 requires LSEs to file Attestation Letters as an advice letter and serve the Attestation Letter on the service list in Rulemaking ("R.") 06-04-009. This Attestation Letter is filed pursuant to that process.

D.07-01-039 requires LSEs to list long-term financial commitments of five years or longer that they have entered into during the prior year. Furthermore, D.07-01-039 requires documentation demonstrating that LSEs have complied with the EPS, by demonstrating:

- (a) That the commitments were not "covered procurements" under the interim EPS rule and/or

- (b) For those that represent covered procurements, documentation demonstrating that such procurements are EPS-compliant, including any contracts with a term of five years or longer that include provisions for substitute energy purchases.
- (c) For any requested reliability-based exemptions that have been pre-approved by the Commission, a reference to the application and Commission decision number.

D.07-01-039 requires all LSEs to disclose the investment amount and type of alteration to retained generation, by generation facility and unit. D.07-01-039 also advises LSEs to present documentation regarding the design and intended use of the powerplant(s) underlying their new long-term financial commitments utilizing the sources of information listed in California Public Utilities Code § 8341(b)(4), as well as any other sources of documentation that they believe will be relevant to this determination.

D.07-01-039 emphasizes that the key concept is to establish the design and intended use of the powerplant. Accordingly, documentation of the annualized plant capacity factor for the powerplant should include historical annual averages in order to help determine whether the plant is “designed and intended” to be used for baseload generation. D.07-01-039 requires LSEs to provide documentation of capacity factors, heat rates, and corresponding emissions rates that reflect the actual, expected operations of the plant.

COMPLIANCE

This Attestation Letter comports with the requirements in D. 07-01-039.

TIER DESIGNATION

This advice letter is submitted with a Tier 2 designation.
