

Bear Ready participants need to select an Electric Vehicle Supply Equipment (EVSE) that meets or exceeds these requirements:

1. Be VGI capable.
2. Use VGI communication protocols, such as Open Charge Point Protocol (OCPP), OpenADR 2.0b, and/or IEEE 2030.5 or greater.
3. Offer an electric utility dashboard to view real-time EVSE production and produce (hourly/daily/weekly/monthly) reports.
4. Have a mobile website or application that can communicate with the user (participant's customer) and signal price changes and availability status.
5. Ability to set prices by TOU plus a set percentage.
6. Be able to mount outside and be weatherproof.
7. Offer a minimum two-year warranty.

The EVSE needs to be selected, but not necessarily purchased, prior to the Bear Ready electrical contractor initial design. The placement of the electric runs is dependent to the type of EVSE selected. Once selected, participants will not have the option to change to a different EVSE. All electric runs will be 208/240V x 40A, allowing the EVSE to output 7.2 or 7.7 kWh.

A few recommended EV chargers have been provided on the following pages. While these chargers are recommended, any EVSE that meets the **Bear Ready** requirements can be utilized.

Single port EV chargers

JuiceBox Pro 40C

J-1772 connector type

Network Services: \$0 - \$10/mo¹

Wall Mount: \$1,200-\$1,700²

Ballard Mount: \$1,700-\$2,300²

Contact: bianca.jimenez@enel.com

¹ WiFi connection costs \$0, Cellular connection will require a cellular card \$549 (one-time) and \$120/year annual plan (up to 8 ports in a 150-foot radius).

² Prices are subject to change.

CT4011 and CT4013

J-1772 connector type

Network Services: \$20.83/mo per port

Wall Mount (CT4013): \$4,500³

Ballard Mount (CT4011): \$5,000³

Contact: robb.lichtman@chargepoint.com

³ Prices are subject to change. Lease options available at \$180/mo for Single Port with 2-year prepaid subscription.

CT4011

CT4013

Dual port EV chargers

Juice Pedestal

J-1772 connector type (x2)

Network Services: \$0 - \$10/mo⁴

Wall Mount: N/A

Ballard Mount: \$5,400⁵

Contact: bianca.jimenez@enel.com

⁴ WiFi connection costs \$0, Cellular connection will require a cellular card \$549 (one-time) and \$120/year annual plan (up to 8 ports in a 150-foot radius).

⁵ Prices are subject to change.

CT4021 and CT4023

J-1772 connector type (x2)

Network Services: \$20.83/mo per port

Wall Mount (CT4023): \$6,700⁶

Ballard Mount (CT4021): \$7,200⁶

Contact: robb.lichtman@chargepoint.com

⁶ Prices are subject to change. Lease options available at \$240/mo for Dual Port with 2-year prepaid subscription.
